

## **Plant Biotechnology Persa**

### Checklist

## **Ilam University of Medical Sciences**

The following list contains some key points that a manuscript must be complied with. Please note that this sheet is guide to review and should not be used as a review form.

### **Manuscript Title**

Proper reflection of the contents  
Concise  
Not a questioning form Not a declarative form

### **Abstract**

Complete yet succinct Independent  
Proper length

### **Keyword**

3-6 words  
MeSH

### **Introduction**

Informative but brief background for the readers  
The present scientific gap described  
Study rationale adequately described  
Clear statement of the objectives of investigation

### **Materials and Methods**

Proper Sampling  
Clear inclusion/exclusion criteria Clear description of methods Scientifically acceptable methods  
Study design consonant with the objectives Adequately described ethical issues

### **Results**

Providing the expected results  
Proper statistical analyses and reports  
Results in line with the study's objectives presentations of this paper in meetings are mentioned in the covering letter.

### **Discussion**

Already published studies mentioned  
Well description of differences/similarities with other studies Discussing the potential limitations of the study

### **Conclusions**

A brief conclusion according to the study's questions Acceptable degree of certainty in the conclusion

### **Attachments/Special sections**

Conflict of interest  
Consent for publications  
Availability of data and material  
Funding/Support

### **References**

Valid and up-to-date  
Style complied with the journal's format

### **Tables and Figures**

Informative  
Additional data to the text
